DETAILED ACTION

1. Claims 1, 2, 4-20, 22-35, and 37-67 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1, 2, 4-20, 22-35, and 37-67 are rejected under 35 U.S.C. 102(e) as being anticipated by Bell, 6,088,370.

As to claims 1, 2, 4-20, 22-35, and 37-67, Bell discloses the invention substantially as claimed, as Bell discloses an interface to transfer data directly between a memory control hub (MCH) and an input/output control hub (ICH) within a computer system, comprising a data signal path to transmit data in packets via split transactions, and a set of command signals, wherein the interface provides a point-to-point connection between the MCH and the ICH, exclusive of an external bus connected directly to the interface, wherein information is transmitted in source synchronous clock mode via request and completion packets including transaction descriptors (note Figures 1 and 2A and column 2, line 15 – column 3, line 25).

Response to Arguments

Art Unit: 2181

4. Applicant's arguments filed 1/25/02 have been fully considered but they are not persuasive for the following reason:

Bell does not disclose an interface between a memory control hub (MCH) and an input/output control hub (ICH).

Bell discloses in column 2, lines 20-25 that the controller 115 can function as a bridge between a memory bus to which one or more memory devices are connected. Examiner is taking the controller operating in this manner to be the memory control hub. Bell also discloses in column 2, lines 25-32 that the bus expander bridges 117 and 120 and the graphics expander bridge 125 are coupled to PCI buses to which PCI devices are connected, and may be coupled to a graphics bus to which graphics bus compatible devices are connected. Examiner is taking the graphics devices connected to the graphics bus and the PCI devices coupled to the PCI buses to be I/O devices, and therefore the expander bridges read on the input/output control hub (ICH).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2181

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
